EXPERIENCE

•GetNear – Hyperlocal Marketplace | getnear.net

Software Intern

Feb 2026 – May 2026

Remote

- Built a production Android marketplace (Flutter/Dart) enabling buyers to broadcast real-time product inquiries to nearby sellers via geolocation and category-based filtering using Firebase Cloud Functions and Haversine-distance ranking.
- Integrated Firebase Auth (Email/Password, Google Sign-In, Phone OTP, anonymous), Firestore, Cloud Storage, and FCM for end-to-end inquiry lifecycle workflows, seller responses with six availability statuses, buyer visit confirmation, and deal tracking.
- Developed real-time 1:1 in-app chat between buyers and sellers per inquiry thread, and AI-powered product category suggestion using Google Cloud Vision API on inquiry photo upload.
- Engineered Blood Donation Module and Targeted Promotions System with admin-managed campaigns; enforced Firestore security rules for role-based data access across Buyer, Seller, Donor, and Admin roles.

•Loop : The Developer's Club

Executive

Aug 2025 – Present

SOE, JNU

- Organized technical workshops on full-stack development and DSA; authored SOPs and executed hackathons, increasing student engagement by 20%.

PROJECTS

•CampusConnect – University Event Management

Full Stack | Node.js, Express, React, MongoDB, JWT, Google OAuth, Cloudinary

2026

campus-connect-se.vercel.app

- Built full-stack platform with RBAC, JWT and Google OAuth authentication, REST APIs for multi-step event approval workflows, and user registration management with MongoDB Atlas and Cloudinary cloud storage integration.

•Library Seat Availability System

Computer Vision | Python, OpenCV, YOLO, Flask, React

2026

central-library-jnu-live.vercel.app

- Built end-to-end pipeline with live CCTV feeds, YOLO-based object detection for real-time seat occupancy tracking, Flask REST API, and live React dashboard reducing student library search time significantly.
